Java or JavaScript

HTTP/HTML only	JavaScript	Java
Platform	Mostly multi-platform	
Development cost	Low	Rather low
Response times	Less good	Fast for downloaded code
	Slow download, then fast	

Example: Pushing a button may not require any download, just execution of code already available in the client.

Web pages printable and visible on small screens

Web pages less wide than 514 pixels can be printed on both A4 and US Letter sized paper without loss of information.

Web pages less wide than 600 pixels can be shown on portable computers with 640x480 screen sizes without any need for horizontal scrolling.

At <http://www.dsv.su.se/~jpalme/web-ruler.html> you can find a ruler, which you can use to test the width of your web pages, as shown by the example below.

Lokal	Dag	Tid	Typ	Vem	Innehåll
F3	19 jan	16.30-18.00	F	JP	CMC och CSCW översikt och tillämpningar
???	19 jan ???	18.40-20.10	L	MB, MO	Whiteboard (Sun) grupp 1
F3	20 jan	16.30-18.00	F	JP	Tillämpningar (forts), Distansundervisning

Why is Multi-Country Software Development Problematic

When software is designed by a small team of people sitting together, these can easily overcome such problems by immediate face-to-face communication. This is not possible in international co-operation, with developers sitting in offices at large geographical distances. Communication will primarily be through [e-mail](#) and telephone, combined with audio and video meetings and/or face-to-face meetings. The travel cost for face-to-face meetings and the disruption they cause to normal work means that they cannot be held frequently enough. And problems encountered often need immediate solution, cannot wait for the next scheduled face-to-face meeting.

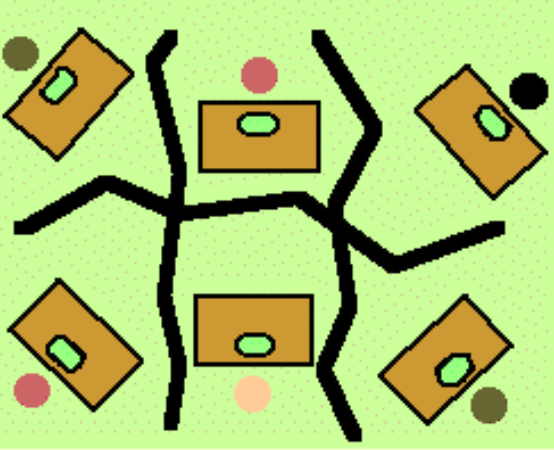

[It is a well-known fact](#), documented by much research in the area of [CMC \(Computer Mediated Communication\)](#), that while e-mail and similar communication tools are very useful, they easily get stuck in contrary positions and discussion continues endlessly on issues which would best have been solved by immediate solutions. It is much easier to fully grasp complex issues, understand each others position, and find mutually good solutions, in small face-to-face meetings in which only the directly involved people participate. Formally scheduled face-to-face meetings to which people travel paradoxically often become too large for effective problem solution.

Rendering of second paragraph 8 bit color

[It is a well-known fact](#), documented by much research in the area of [CMC \(Computer Mediated Communication\)](#), that while e-mail and similar communication tools are very useful, they easily get stuck in contrary positions and discussion continues endlessly on issues which would best have been solved by immediate solutions. It is much easier to fully grasp complex issues, understand each others position, and find mutually good solutions, in small face-to-face meetings in which only the directly involved people participate. Formally scheduled face-to-face meetings to which people travel paradoxically often become too large for effective problem solution.

Review

Laser printers

by Kristina Blachere and Suzanne Courteau (09/22/98)

Personal laser printers put near professional-quality printouts at your fingertips. And unlike bulky business lasers, they're also within most home-office budgets. If you sat out last season and waited to buy a laser, you're in luck now. The last crop we reviewed impressed us with their wealth of features for less than \$500, but this time around, we're bowled over.

Power printing

The eight monochrome lasers in this review range in price from \$299 to \$399 (estimated street price), and all offer respectable quality. Each one sports a hefty, 600-by-600-dpi resolution and speeds ranging from 4 pages per minute (ppm) to almost 9 ppm. And these aren't stripped-down models: several of the lasers in our roundup offer optional network cards, PostScript support, envelope/label feeders, and extra paper trays.

To separate the real values from the merely bargain priced, we put all eight lasers (from seven manufacturers)

8 low-cost lasers

- Brother HL-1040
- Brother HL-1050
- Kyocera FS-600
- Lexmark Optra E+
- Minolta PageWorks 8L
- NEC SuperScript 870
- Okidata Okipage 6ex
- Xerox DocuPrint P8

• **CIET recommends**
We tell you which laser printer deserves your precious desk space.

• **Company guide**
Check out the features and performance results of these personal lasers.

How this web page was done:

World Wide Web HMI Design

- The same HTML may be formatted different for different viewers
 - ⇒ Test with different browsers and page widths
- Some users are using portable computers with small screens
 - ⇒ Avoid dithering of same-coloured areas
 - ⇒ Use only 216 colour Web-safe palette
- Download time can take a lot of time, especially over modem connections
 - ⇒ Use small graphics, especially for animated gifs
 - ⇒ Compress graphics
 - ⇒ Repeat the same graphic several times
- Response times is slow when pages are fetched through the network
 - ⇒ Put more data on fewer pages
 - ⇒ Use Java or Javascript to move interaction from the server to the user personal computer

Why did you not include Moscow in the options.
From: cleopatra@ietf.org
Date: 3 Aug 1998
Some of the cities proposed do not have any building suitable for an IETF meeting. So it is meaningless to ask people's views on those locations.
